

CSS

Tip

:last-child

:last-child selector is used match element which is last child of its parent.

Let's try it, with our circle and square example 😊

Follow

me for more tips

:last-child

Let's create 3 circles and squares:

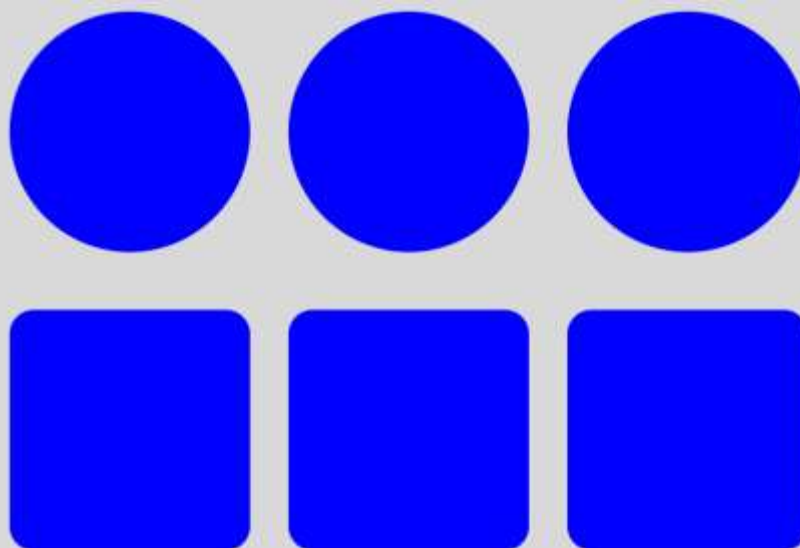

```
<div class="row">
  <div class="circle"></div>
  <div class="circle"></div>
  <div class="circle"></div>
<div class="row">
  <div class="square"></div>
  <div class="square"></div>
  <div class="square"></div>
</div>
```

```
.circle {
  width: 250px;
  height: 250px;
  border-radius: 50%;
  background-color: blue;
}

.square {
  width: 250px;
  height: 250px;
  border-radius: 10%;
  background-color: blue;
}
```

Output:

CSS

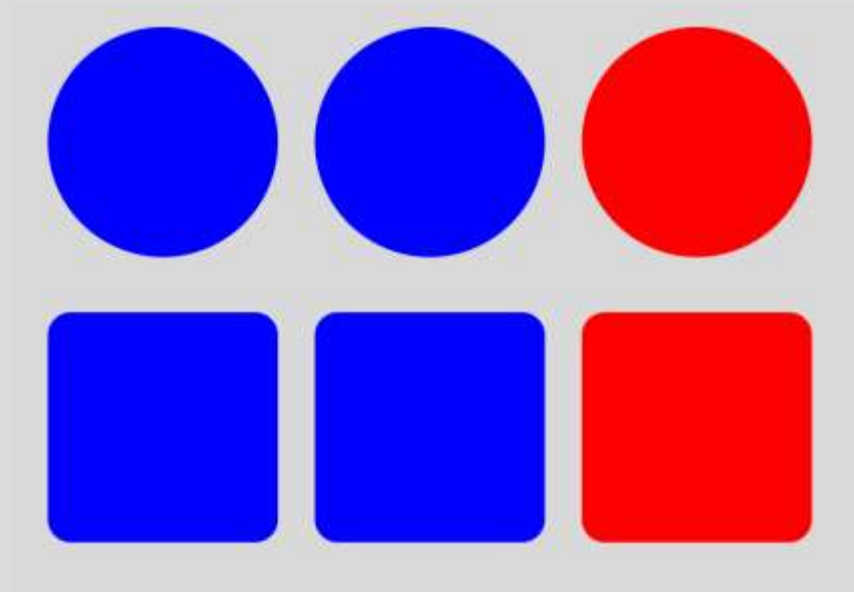

Tip

:last-child

Change the color of last circle and square

```
.circle:last-child {  
  background-color:red;  
}  
.square:last-child {  
  background-color:red;  
}
```

Output:
